

Microscopy Today – January 2025

Minus K Technology Vibration Isolator Educational Giveaway

Minus K is giving away \$25,000 worth of its low-frequency Negative- Stiffness vibration isolators to colleges and universities in the U.S. Requiring no air or electricity, these vibration isolators are used in laboratories worldwide, in support of atomic force microscopes, electron microscopes, interferometers, and other specialized equipment needing vibration isolation. Entry form and application details are available on Minus K's website www.minusk.com. Deadline to apply is February 28, 2025
